Section: Academic Integrity projects and applications

Abstract:

Cheating students is a widespread problem. Following this, a project called Global Essay Mills Survey (GEMS) was launched to explore student self-reported use of essay mills and associated sites or companies. This paper deals with cheating students in the Czech Republic and shows results from data collected through GEMS. More than 500 respondents answered questions related to contract cheating - students' motivation, circumstances, experience and opinions.

Keywords: Academic integrity, contract cheating, Global Essay Mills Survey, GEMS.
